### Radiator Seal HP 300ml

£14.99

Protection for all water-cooled systems of older designs without dirt strainers.

#### Uses / Areas of Use:

 type=image,width=39.675,height=30.9465

112.46 0 87.72 28.35 492.15 cm /l2 Do Q

- For hairline cracks in radiator, engine block or cylinder head.
- In the event of leaking hose connections.
- In the event of defective head gaskets.
- Mixes with all conventional antifreezes and coolants.
- Also suitable for closed cooling systems.
- Caution: If there are any dirt strainers in the cooling system, Radiator Seal must not be used.

#### Application:

**Shake can well before use. Add contents of can to warm coolant. Open heating valves and run engine for at least 10 minutes. Check coolant level and inspect for leaks.**

#### Dosage:

**Sufficient for 10 litres of coolant. Maximum mixture ratio for lorries is 1 to 100.**
