112.46 0 0 86.22 28.35 493.65 cm /l2 Do Q

Advantage:

- Optimal creep properties guarantee outstanding penetration and removal of rust.
- Contains liquid, highly effective molybdenum compound OMC2.
- In contrast to products containing solid lubricants, e.g. MOS2,
- OMC2 does not separate in larger containers.
- Friction is reduced.
- Best possible lubricating effect by smoothing of the metal surfaces.
- Compounds permanently retain gliding capability.
- Optimal corrosion protection owing to corrosion protection additives.
- Lasting protection against further corrosion.
- Free from resins and acids.
- Silicone-free.
- Compatible with rubber and plastics.
